

Weigh-Safe Understands the Importance of “Made in the USA”

Weigh-Safe is proud to state that the innovative and popular Weigh-Safe & 180 Hitch is made in the United States of America. Since 2014, we have been focused on providing the public with towing products that are not only high in quality and reliability, but also key to towing safety and performance. Our mission is to offer people everywhere “Towing Peace of Mind”.

Started in Lindon, Utah, Weigh-Safe has been manufacturing the Weigh-Safe and 180 hitch in the same town since it’s beginning 5 years ago and has continued to do so as we rapidly grow. The aluminum and steel come straight out of America’s Heartland from companies that we trust. These materials are then thoroughly inspected and passed off by our team of industry professionals and then machined by our CNC machinery, hand polished, and assembled.

As we continue to grow, we remain committed to ensuring that our products live up to the high expected industry standards as we provide towing customers with products they can proud to use with their vehicles.
